## Digestive Enzyme Blend with Stabilized Probiotics

Optimizes  
Digestion

Increases Nutrient  
Absorption

Improves  
Metabolism

## Enjoy a Healthier Gut

Enrich is one of the most impactful digestive-enzyme formulations on the market today. Each enzyme helps promote optimal digestion, so you get the most nutrients out of everything you eat.\*

### Benefits of Enrich

#### Digestion

Your one-stop shop for optimal digestive health, Enrich has enzymes that help digest all five major food groups. The enzyme blend in Enrich supports the digestion of all major food groups—including proteins, fats, and complex carbohydrates—promoting optimal nutrient absorption and digestive comfort.\*

#### Nutrient absorption

If you lack a diverse enzyme profile, you might miss out on nutrients from the food that you eat. Enrich is a powerful digestive enzyme blend designed to optimize nutrient absorption and utilization, effective across various stomach pH levels. \*

#### Improves metabolism

The gut microbiota not only strengthens the protective gut barrier but also plays a crucial role in optimizing metabolic processes. By aiding in the digestion and absorption of nutrients, it enhances energy extraction from food and promotes overall metabolic efficiency\*.

### Ingredients that set us apart

#### Proprietary Enzyme Blend

Enrich features a blend of 11 powerful digestive enzymes that enhance the digestion of major food types such as gluten, proteins, carbohydrates, fiber, dairy, and fats. This proprietary blend supports gut health, promotes healthy digestion, and helps alleviate discomfort and bloating.\*

#### Stabilized Probiotics

Probiotics are 'good' gut bacteria that improve digestion, fight off harmful bacteria, and line the digestive tract. Our specially fermented probiotic blend is more bioavailable, supporting optimal digestive health, balancing the microbiome, and enhancing nutrient absorption.\*

#### Prebiotic Food Blend

The key to effective digestive supplements is the combination of probiotics and prebiotics. Probiotics maintain a healthy microbial balance in your digestive tract, while our prebiotic blend nourishes these strains, allowing them to thrive.\*

## Digestive Enzyme Blend with Stabilized Probiotics

**How to use:** Take 1-2 capsules with smaller meals and 3 capsules with larger meals.

Supplement Facts		
Serving Size: 3 capsules Servings per Container: 30		
	Amount per Serving	%DV*
Zinc (as Zinc Bisglycinate Chelate ‡)	1.35 mg	12%
Copper(as Copper Bisglycinate Chelate ‡)	0.90 mg	100%
Manganese (as Manganese Bisglycinate Chelate ‡)	0.60 mg	30%
Proprietary Enzyme Blend	675 mg	**
Gluten & Protein Enzymes (Protease I, Peptidase, Serrapeptidase, Protease II), Carbohydrate Enzymes (Amylase, Invertase, Maltase), Fiber Enzymes (Hemicellulase, Cellulase), Dairy and Fat Enzymes (Lactase, Lipase)		
Prebiotic & Food Blend	120 mg	**
Inulin (from Artichoke and Chicory Root), Ginger Root powder, Licorice Root extract, L-Glutamine, Molasses.		
Probiotic Blend (1 Billion CFU <sup>1</sup> )	50 mg	**
Lactobacillus Acidophilus, Lactobacillus Plantarum, Streptococcus Thermophilus, Lactobacillus Bulgaricus.		

\*Percent daily values are based on a 2,000-calorie diet.  
\*\*Daily Value (DV) not established.

**Other Ingredients:** Vegetable cellulose (capsule), Rice hull concentrate, Gum fiber blend, Rice extract blend.

**Does not contain:** Corn, Milk, Eggs, Sugar, Artificial colors, Starch, or Preservatives

<sup>1</sup> Colony-Forming Units. At time of manufacture.

## Digestive Enzyme Blend with Stabilized Probiotics

### What do enzymes do, and why are they important?

Your body uses special cells to make digestive enzymes, which help break down foods into nutrients that can be used by your body. When your body is unable to digest a certain food, it simply passes right through you, depriving you and your body of the benefits it would have provided.\*

### How many enzymes are in this product?

Enrich contains 11 different enzymes. Each enzyme is listed below and paired with foods they help to digest:\*

Enzyme	Helps Digest
Protease I	Gluten & Protein
Peptidase	Gluten & Protein
Serrapeptidase	Gluten & Protein
Protease II	Gluten & Protein
Amylase	Carbohydrate
Invertase	Carbohydrate
Maltase	Carbohydrate
Hemicellulose	Fiber
Cellulase	Fiber
Lactase	Dairy & fat
Lipase	Dairy & fat

### What is the difference between a probiotic and a prebiotic?

Probiotics are the living bacteria in your digestive system that keep your microbiome in order, improve digestion, and fight off bad bacteria. Since they are living things, they need nutrients ("food") to survive and thrive. Prebiotics act as the food and fuel for probiotics.\*

### How do probiotics work?

Probiotics help replenish the "good" gut bacteria that help line the digestive tract, support and improve digestion, and fight off bad bacteria. When they succeed, your overall health usually does too!\*

### Are prebiotics safe?

Yes, prebiotics are safe when used as directed. Our bodies obtain them through the food we eat; however, if you want to increase your nutrient intake, it's recommended to incorporate prebiotics into your daily regimen.\*

### Why is gut health important?

The human gut houses trillions of microbes, such as viruses, fungi and bacteria. We call this our gut microbiota. Ideally, we want a harmonious balance of different bacteria to keep our gut healthy. Having a healthy gut is key to optimal digestion, nutrient absorption, and energy metabolism.\*

### How does this product help with nutrient absorption?

Since proteins, plant fibers, carbohydrates, and fats are all broken down differently, you need a wide spectrum of enzymes to ensure optimal digestion. Enrich has enzymes that cover all the main food groups to allow for easier digestion and better nutrient absorption from any food you eat.\*

### Does Enrich improve comfort after meals?

Yes, Enrich helps ease bloating and reduce gassiness.\*

### Can this product cause diarrhea?

If you experience stomach discomfort or diarrhea, please consult your medical professional.

### Can this product help clear up my skin?

There's a strong connection between your gut and your skin called the gut-skin axis. Therefore, maintaining or improving your gut health may support clearer, healthier skin.\*

### Can you get these enzymes from the food you eat?

Yes, however it's hard to get enough enzymes from food alone. Factors like age, lifestyle, and genetics can restrict enzyme production and limit your access to valuable nutrients. For optimal gut health it is important to include a digestive enzyme blend in your daily regimen.\*

# ENRICH

## Digestive Enzyme Blend with Stabilized Probiotics

### **What does serrapeptidase do, and why is it included in Enrich?**

This systemic enzyme has been shown to help turn food into energy and is generally used to break protein down into amino acids.\*

### **What does lipase do, and why is it included in Enrich?**

This enzyme helps break down and process fats. It can also help ease stomach discomfort and improve nutrient absorption. It is one of the main ingredients in our proprietary enzyme blend.\*

### **What does papain do, and why is it included in Enrich?**

Papain breaks down even the toughest of proteins and is one of the main ingredients in our proprietary enzyme blend.\*

### **What are some of the additional key ingredients in this product?**

**Licorice root** - This powerful antioxidant not only supports digestion, but it also helps protect your cellular health too.\*

**Artichoke** - Loaded with nutrients, artichoke helps improve digestive health and ease digestive discomfort.\*

**Inulin** - A source of dietary fiber that is great for improving digestive health.\*

**Glutamine** - An amino acid that is a building block of protein. It promotes digestive and brain health, helps boost athletic performance, and is helpful in supporting gut and intestinal issues.\*

### **Is Enrich safe for children, and/or for women who are pregnant or nursing?**

This product is recommended for persons 18 years of age and older. If you are pregnant and/or nursing, we recommend consulting with your healthcare provider.
